ORIENTED STRAND BOARD (OSB)

KTC personnel participated in the Engineering of their \$100 million Green-field OSB Production Plant in 1996, located in Whites Creek, Tennessee USA.

The work included Project Planning and Management, Preliminary Engineering, Scheduling, Specifications, RFQ's, COT's and Capital Cost Budgeting.

During the execution phase of the project KTC personnel provided complete Process, Mechanical, Civil, Electrical, Structural Engineering and Site Assistance.

The contract included the complete Design of all OSB equipment and Support Steel.

The Detail Engineering and Site Assistance were under a Turnkey Contract by Casey Industries.
