- High Pressure Slack Wax
- Disc Flakers

ORIENTED STRAND BOARD (OSB) PLANT

KTC personnel engineered Norbord's \$145 million Greenfield OSB plant (2001) in the state of Alabama, USA.

Project services included Planning, Preliminary Engineering, Capital Cost Budgeting, Project Management, Scheduling, Standards, Specifications, RFQ's, COT's, and Equipment Purchasing Assistance.

During the execution phase, KTC personnel provided services such as Mass and Energy Balances (Process), Mechanical, Civil, Electrical and Structural Engineering, including Construction Management Assistance.

For local shop fabrication we designed and detailed Log and Strand Handling Equipment.
