ORIENTED STRAND BOARD

Norbord Guntown, Mississippi

PROJECT HIGHLIGHTS

- 400 Million ft²/yr
- 9ft x 24ft x 14 Opening Press
- Conveyor Dryers
- Energy System
- Tree Length Log Processing

ORIENTED STRAND BOARD (OSB) PLANT

KTC personnel engineered Norbord's \$80 million new OSB plant in Mississippi, USA.

OSB production began in 1994.

The work included project planning and management, preliminary engineering, scheduling, specifications, RFQ's, COT's and capital cost budgeting.

During the execution phase of the project KTC personnel provided complete process, mechanical, civil, electrical and structural engineering.

The contract included the complete design, supply and installation of all OSB equipment.
