

### PROJECT HIGHLIGHTS

- 750 Million ft<sup>2</sup>/yr <sup>3</sup>/<sub>8</sub>" Basis
- 8ft x 231ft Continuous Press
- Green Strand Screening
- Log Conditioning Ponds
- Pond Loader (Grapple) fed Debarking
- Dry Bulk Storage
- N.A. Specialty / Commodity Markets

### ORIENTED STRAND BOARD / LUMBER (OSB/OSL) PLANT

KTC engineered Tolko's \$300 million Green-field OSB / OSL plant (2007) in the province of Alberta, Canada.

Project services included Planning, Preliminary Engineering, Capital Cost Budgeting, Project Management, Scheduling, Standards, Specifications, RFQ's, COT's, and Equipment Purchasing Assistance.

During the execution phase, KTC provided services such as Mass and Energy Balances (Process), Mechanical, Civil, Electrical and Structural Engineering, including Construction Management Assistance.

For local shop fabrication we designed and detailed Log and Strand Handling Equipment.
