ORIENTED STRAND BOARD

Tolko High Prairie, Alberta

PROJECT HIGHLIGHTS

- 516 MM ft² / yr ³/₈" Basis
 - Today 620 MM ft² / year
- 12ft x 24ft x 12 Opening Press
- Conveyor Dryers
- Log Conditioning Ponds
- N. A. Commodity Markets

ORIENTED STRAND BOARD (OSB) PLANT

KTC personnel engineered Tolko's \$130 million Greenfield OSB plant (1994) in the province of Alberta, Canada.

Project services included Planning, Preliminary Engineering, Capital Cost Budgeting, Project Management, Scheduling, Standards, Specifications, RFQ's, COT's, and Equipment Purchasing Assistance.

During the execution phase, KTC personnel provided services such as Mass and Energy Balances (Process), Mechanical, Civil, Electrical and Structural Engineering, including Construction Management Assistance.

For local shop fabrication we designed and detailed Log and Strand Handling Equipment.
